

## Seven Bays Estates Unlimited Tidbits and Phase 2

### Asphalt—Don't Miss Out!

Copenhaver has a temporary asphalt plant in our area now, due to the amount of road work the county has scheduled. Due to the location of the plant, **now is the time to asphalt** as it is almost as cheap as chip seal. We are getting a bid to asphalt the areas that received gravel last year in Plats 1 and 2. If you would like to get added to the list of people who would like bids to **asphalt their driveway**, call (725-5027) or email the office ([sevenbaysestates@centurytel.net](mailto:sevenbaysestates@centurytel.net)) and we will see you are added to the list.

### Caution to Plats 1 & 2

If we go with asphalt, those of you in Plats 1 & 2 be aware that **there will be a ridge**. Where you have asphalt or cement close to the edge of the road, the added asphalt will be higher.

### Are You Getting Bids on Concrete?

Copenhaver ready mix is available in our area at this time and is advertising that they are able to offer very competitive prices. If you are getting bids, be sure to give them a call 509-636-2800.

### Trees

Daniels Nursery wholesales a select variety of trees and shrubs. May 1, 2 (10 a.m. to 4 p.m.) and 3 (10 a.m. to 2 p.m.), they will be open to the public for retail sales. This is a good opportunity to save money if you are in the market. For more information about the trees and shrubs they offer, checkout their website at [danielsnursery.com](http://danielsnursery.com) or call them at 509-738-2633.

### Phase 2 Almost Finished

Below are some pictures of the Phase 2 project for your enjoyment taken by Mac McLaughlin and Darrell Schindler. As you can see, a lot has been happening this winter.

Phase 2 involved building a pump house, installing the pump, motor and electrical boxes; and installing lots and lots of six inch pipe very deep with two good sized hills to traverse. There were very complicated and specific instructions.

Rick Graf has spent a lot of time and sleepless nights making sure that everything was ordered to specifications and getting an okay to use expertise we had available in our community to save money. Due to Warren Damschen's involvement as our water rider we were able to get the engineer's okay to do the pipe work with a minimum of expense.

All of the people involved in making this project a success deserve our appreciation. Later we will have a slide show with everyone involved in the project listed. Please take the time to thank each and every one for the job well done. Don't forget our hard working staff, Jed and Joe. We couldn't have done it without you guys!

Thank you.
